ADITI GUPTA

SELECTED WORKS 2024-2025

I focus on understanding each client's vision and translating it into user-centered spaces. I enjoy exploring varied themes to create designs that are both distinctive and contextually relevant.

about

I am an interior designer based in Delhi, India with over three years of experience working across a range of projects. For me, the approach is minimal and client-focused, with an emphasis on creating spaces that feel both functional and personal.

I enjoy experimenting with different styles to suit each project's needs. I believe good design comes from understanding the client and translating that into thoughtful, well-balanced spaces.

INNOVATION HUB

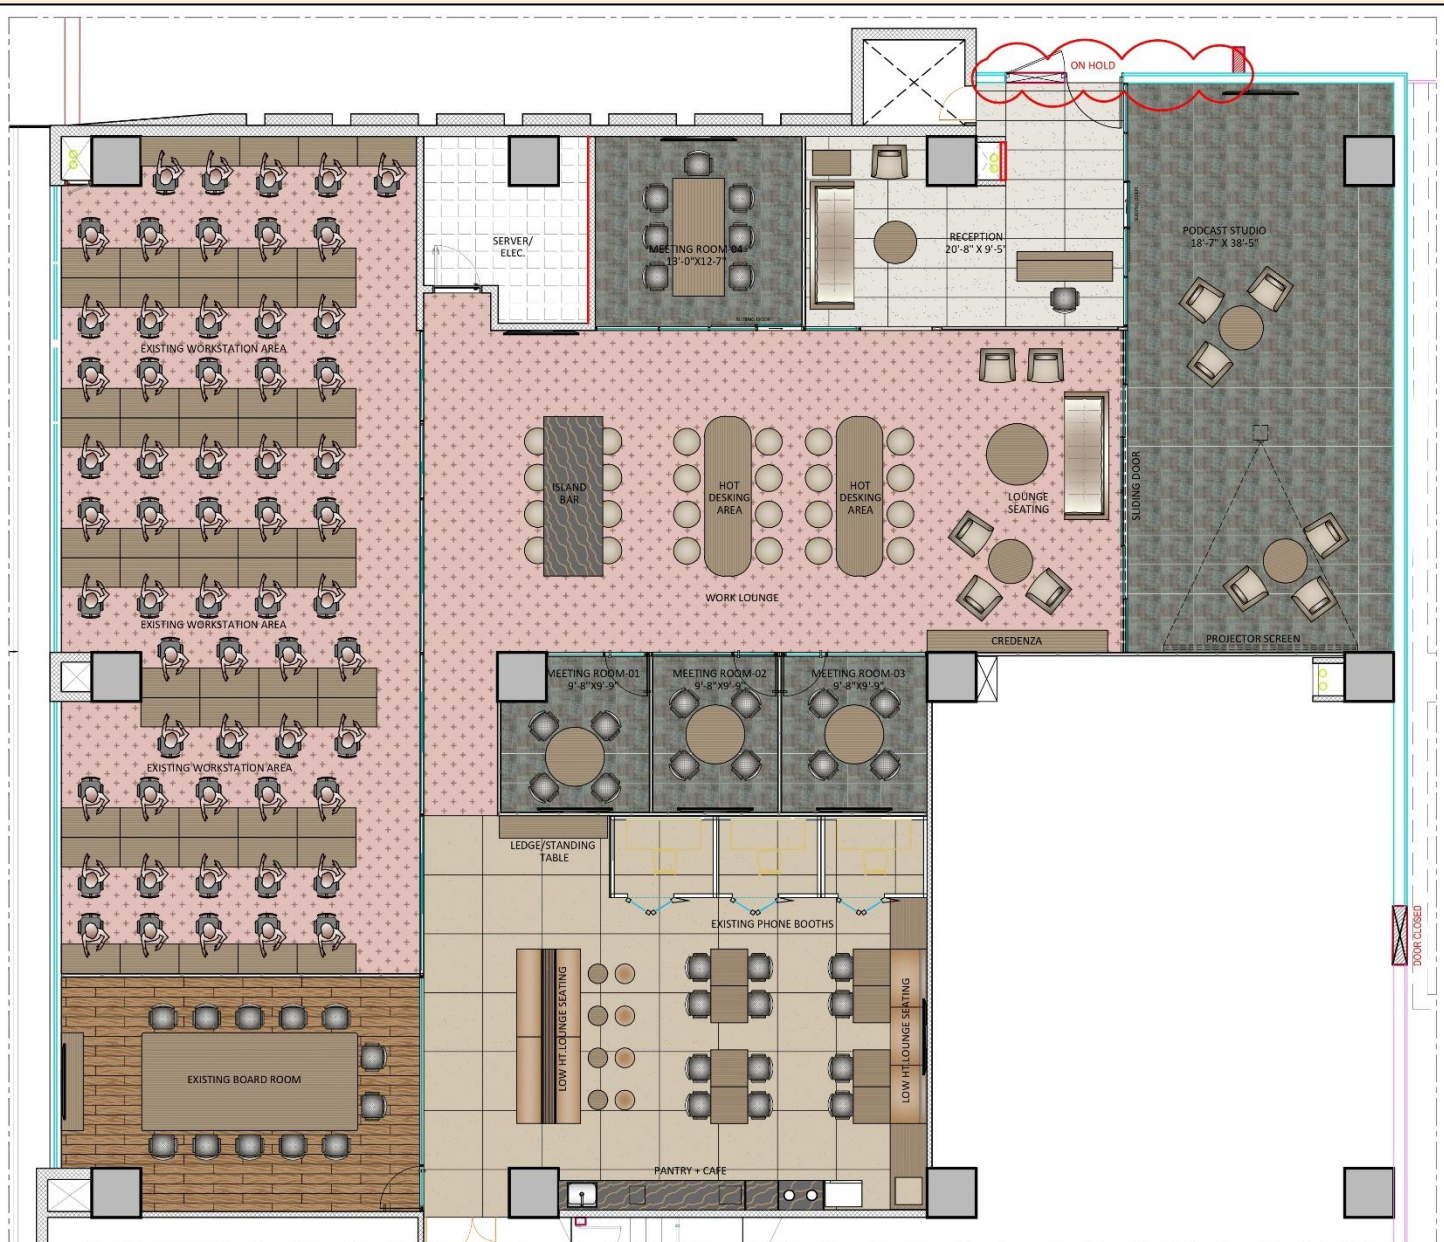

Overview.

The project for *One Impression* explores a contemporary workplace designed around a light, neutral palette and a refined, designer-led aesthetic. The intent was to create a space that feels open, calm, and collaborative rather than traditionally corporate.

This dedicated event space is strategically positioned to overlook the courtyard water feature on one side while connecting to the heart of the office on the other. A movable wall allows for flexible use, from events to town halls, while the floating disc lighting adds a dynamic touch to the space.

01

Gurugram, Haryana
2024

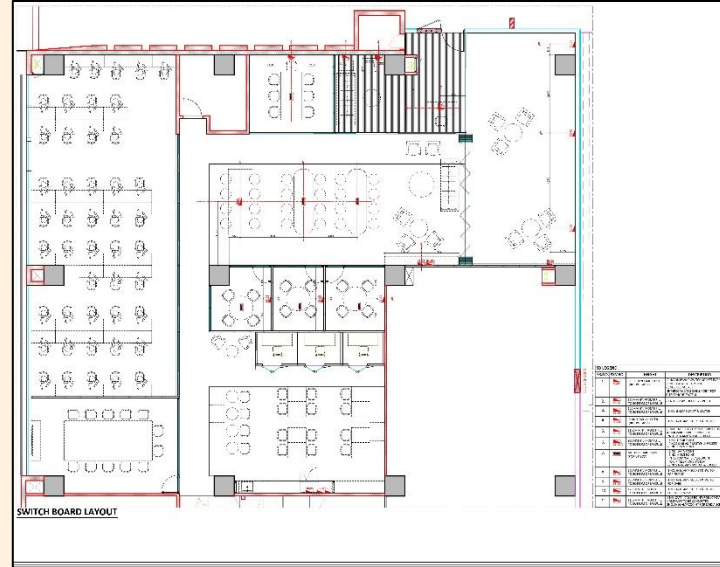

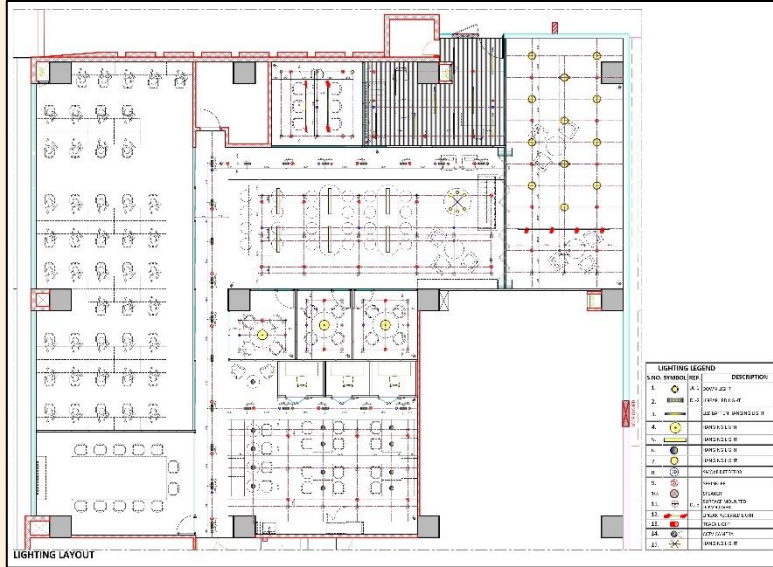

Site plan.

The layout is designed to promote a balance between focused work and collaborative interaction. Dedicated workstation zones are efficiently planned for maximum capacity, while central breakout and lounge areas encourage informal meetings and team engagement.

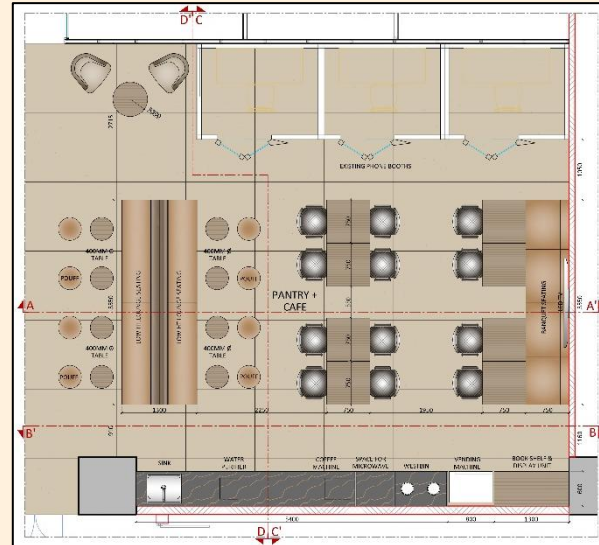

Meeting rooms and private spaces are strategically positioned along the periphery for accessibility without disrupting the open workflow. The inclusion of a boardroom, podcast studio, and café area adds functional diversity, creating a dynamic and well-integrated workspace that supports both productivity and creativity.

technical drawings.

A sneak peak into the technical drawing set translates the design intent into precise, buildable details. Each drawing is developed to maintain consistency, functionality, and seamless on-site implementation of the overall design vision.

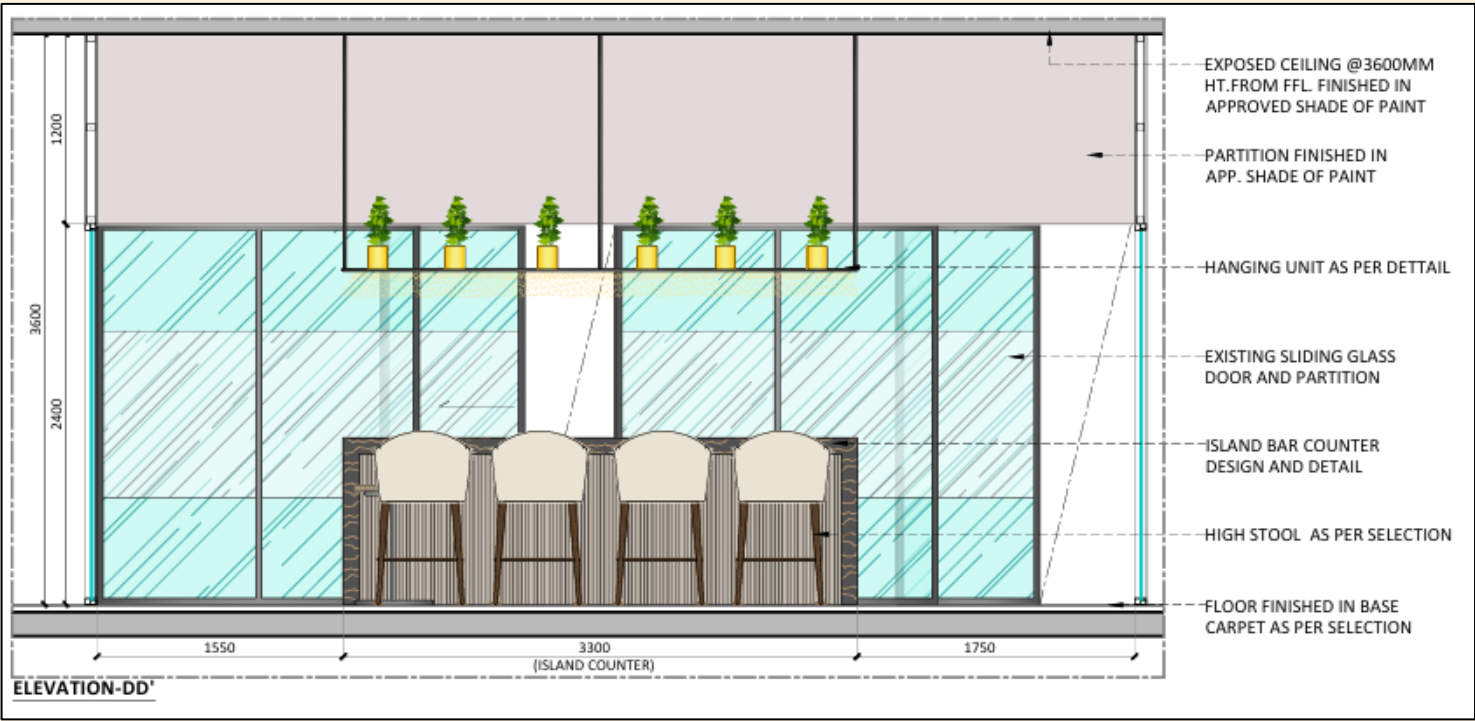

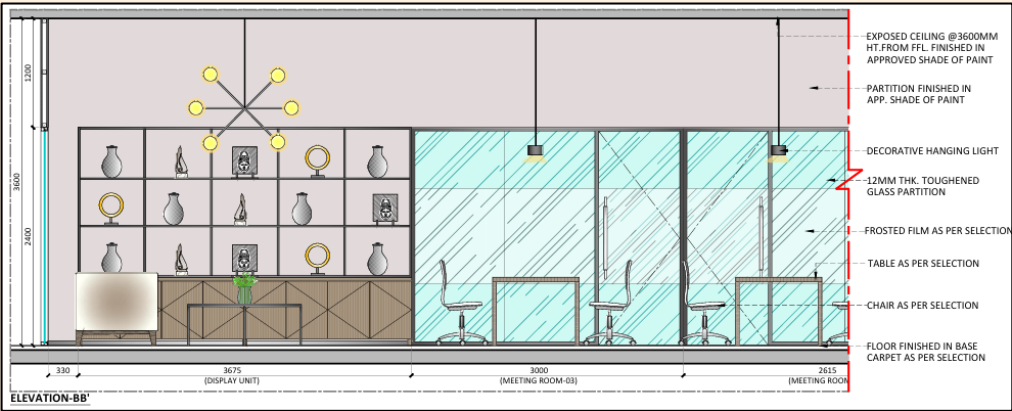

Render Café Area

The Pantry & café Area

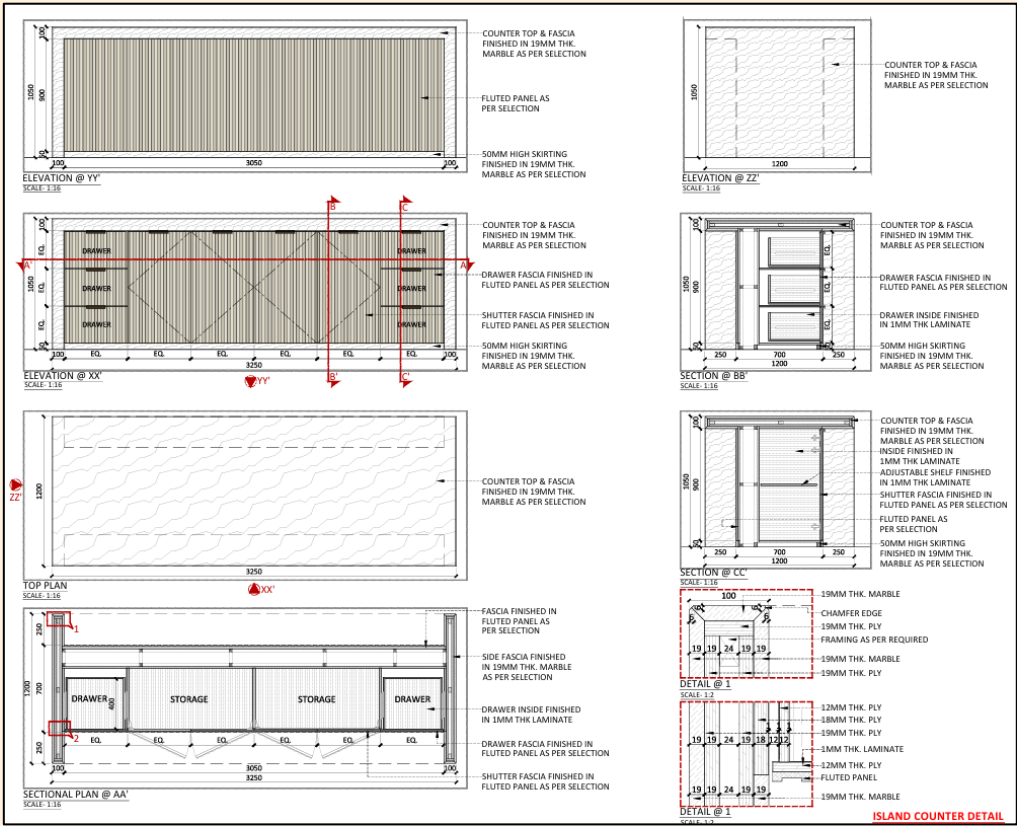

Elevations & sections.

The drawings focus on clear articulation of materials, finishes, and functional detailing. Elevations highlight cabinetry, counter design, and visual aesthetics, while sections define dimensions, joinery, and service integrations. Together, they ensure accurate execution and a seamless blend of functionality with the overall design language.

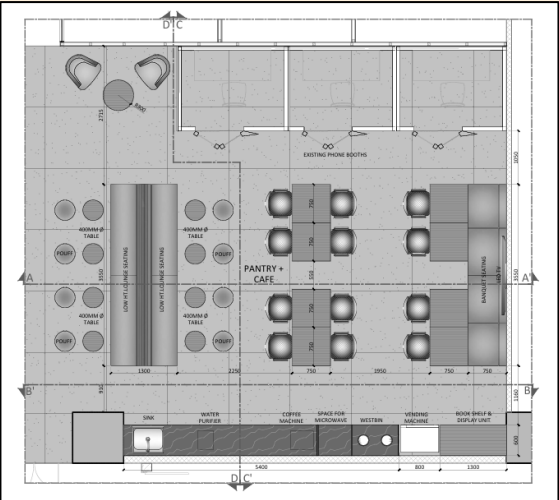

Counter Table – Work Lounge.

A sleek counter table enhances the lounge with a clean, sophisticated aesthetic, offering a flexible surface for informal work and interaction.

Multipurpose Cafeteria.

Key Plan

Phone Booths / Private Spaces.

To address the client’s need for private call and meeting areas, phone booths were thoughtfully integrated within the cafeteria zone. Designed for acoustic comfort, these compact spaces reduce distractions and provide a quiet, focused environment while remaining conveniently accessible within the open-plan layout.

URBAN RESIDENCE

Design intent.

Designed for a family, this compact apartment embraces a modern minimal approach with a focus on seamless flow and functionality. The space is planned to feel open, adaptable, and comfortable, creating a contemporary home that is both practical and easy to live in.

02

*Gurugram, Haryana
2024*

Site plan.

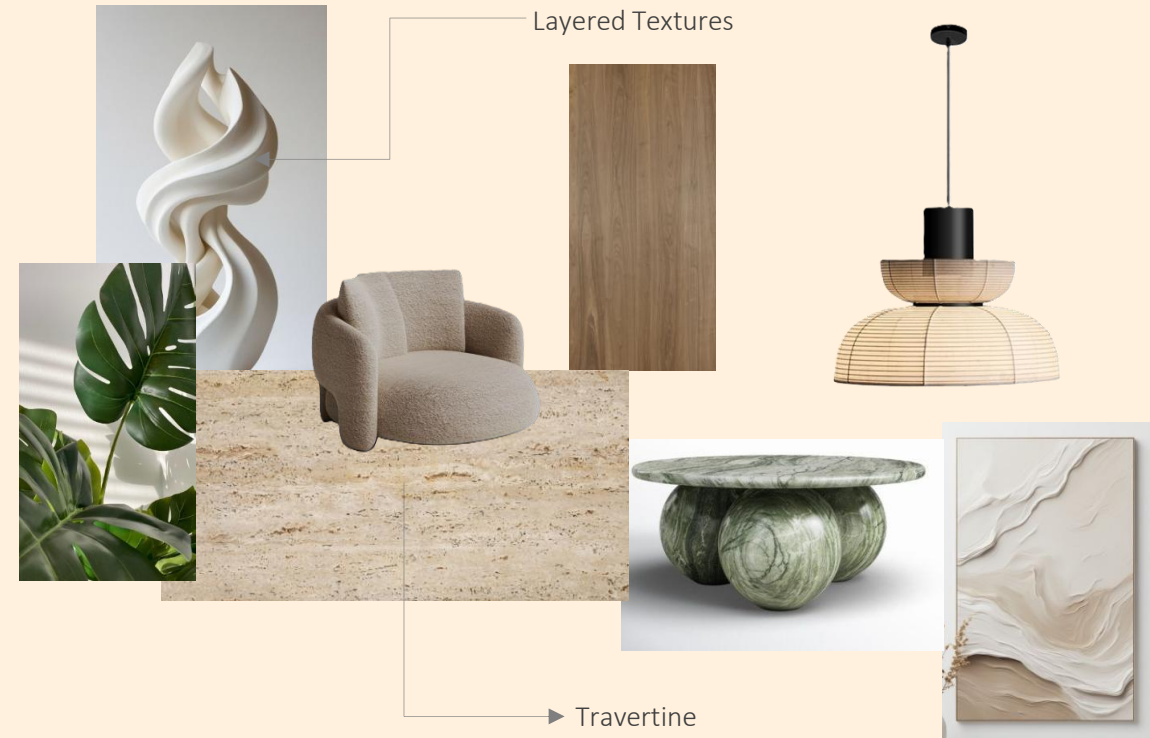

The layout is planned to maximize functionality within a compact footprint, with a clear zoning of private and shared spaces. The living, dining, and kitchen areas are seamlessly connected to enhance openness and daily usability, while bedrooms are positioned for privacy and comfort.

Thoughtful furniture placement ensures smooth circulation, efficient storage, and a balanced use of space, creating a home that feels organized, practical, and easy to navigate.

Render.

design brief.

*A terrace conceived as a calm, multifunctional retreat balancing work and leisure within an open, light-filled setting.
Natural materials, soft forms, and seamless indoor-outdoor connections create a relaxed yet refined environment.*

Design Approach

The client required the terrace to function as both a casual workspace and a cozy lounge for relaxation.

In response, different options were developed, exploring different spatial arrangements to balance functionality, comfort, and visual continuity within a cohesive design language.

Lounge Render

04

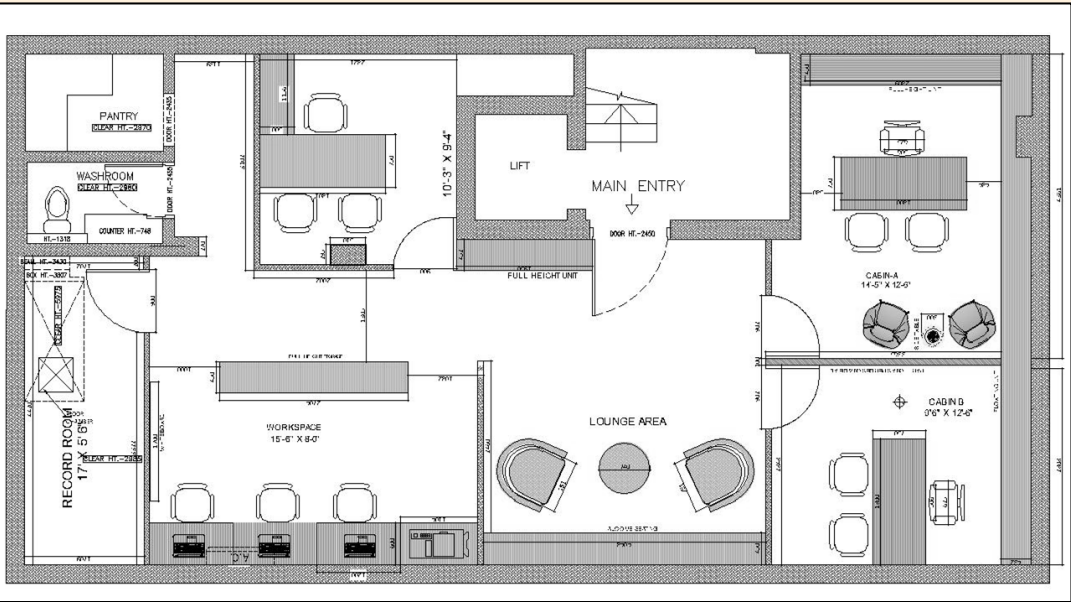

PASTORAL LAW FIRM

Render Entry Area

client brief.

The client wanted a law office that breaks away from the typical formal and rigid environment, instead creating a space that feels welcoming, light, and approachable. The requirement included clearly defined zones for a lounge, meeting areas, workstations, and a private conference room, while maintaining a balanced flow throughout.

*New Delhi, India
2025*

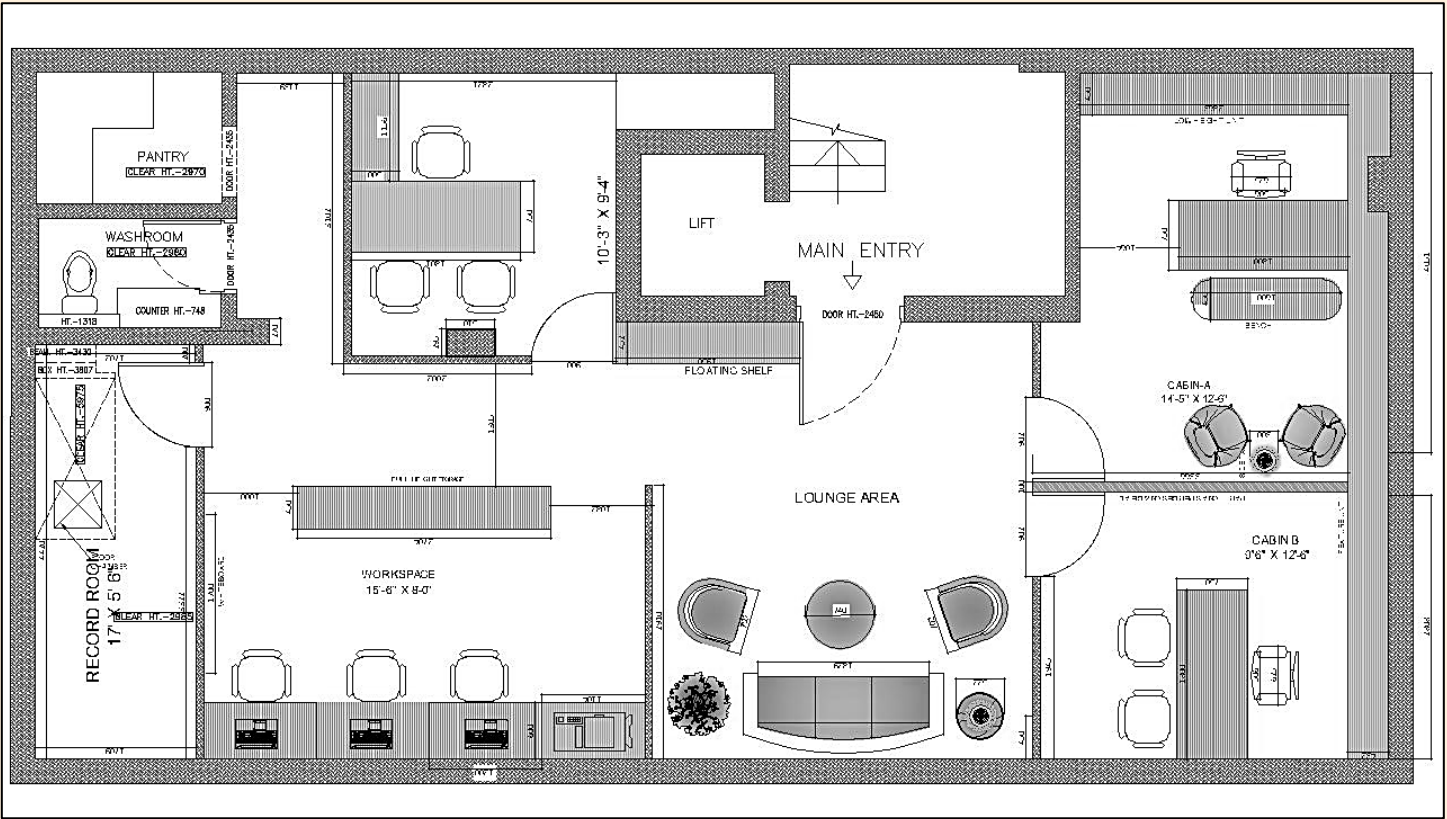

Layout

Entrance Render

concept.

The layout is organized around a clear entry sequence, where a bay seating element at the front creates an inviting pause point upon arrival. This transition zone softens the entry, leading into a well-defined workspace, lounge, and private cabins.

Final design

vision.

The design organizes these functions into distinct yet connected spaces, ensuring privacy without compromising openness. A soft material palette, warm finishes, and subtle textures contribute to a friendly, human-centric environment, redefining the conventional perception of a law office.

With a soft minimal palette accented by contrasting hues for depth and character.

initial concepts.

Divider in black panels/fluted wood panel

Integrated partition with fusion wallpaper accent

Cabin A Feature unit

Column Paneling

Some traditional painting with the standalone chest of drawers

Glass and rattan fusion partition

Floor Mat Pattern

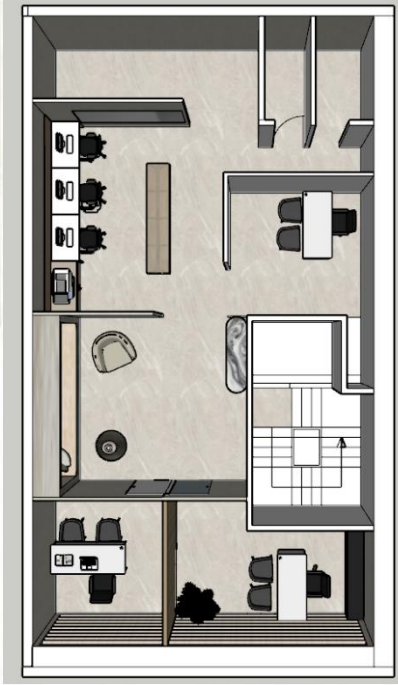

Embossed Custom Feature wall

Minimalist furniture in a neutral-toned palette

The subtle tones enhance natural light flow, making the space feel open and inviting. Carefully selected materials and textures add depth and warmth, ensuring a balance between minimalism and comfort.

Passage Render

design direction.

A partition wall delineates the workstation from the lounge area, featuring curated black-and-white contemporary artworks that seamlessly integrate functional zoning with refined artistic expression.

Render overall space

3d models.

*A collection of 3D studies showcasing the **layout** and material language of the project. The visuals emphasize light, texture, and proportion to clearly communicate the overall design narrative, while strongly maintaining a countryside theme throughout.*

RANNA GILL

*New Delhi, India
2025*

Project Brief

This project for **Designer Ranna Gill** translates the brand's identity into a refined retail environment that balances modern luxury with a sense of understated elegance. The design focuses on creating a calm and immersive shopping experience, where the space enhances rather than competes with the garments.

Vision — Ranna Gill Store

The *Ranna Gill* signage is understated yet powerful, reflecting a philosophy where elegance speaks through restraint. Rather than dominating the space, it integrates seamlessly into the architecture, reinforcing brand presence through subtlety and precision.

Counter- Material highlight

Terrazzo, a mid-century classic, is reinterpreted with a contemporary approach valued for its durability, adaptable colour palette, and distinctive speckled texture.

Approach - materials + color + lighting

Materiality plays a crucial role in shaping the experience. A thoughtful interplay of textures, warm lights, tactile surfaces, and softly diffused glass creates depth and sophistication. This layered approach evokes a sense of timelessness while maintaining a contemporary edge, aligning with the brand's ethos of effortless, enduring luxury.

Render

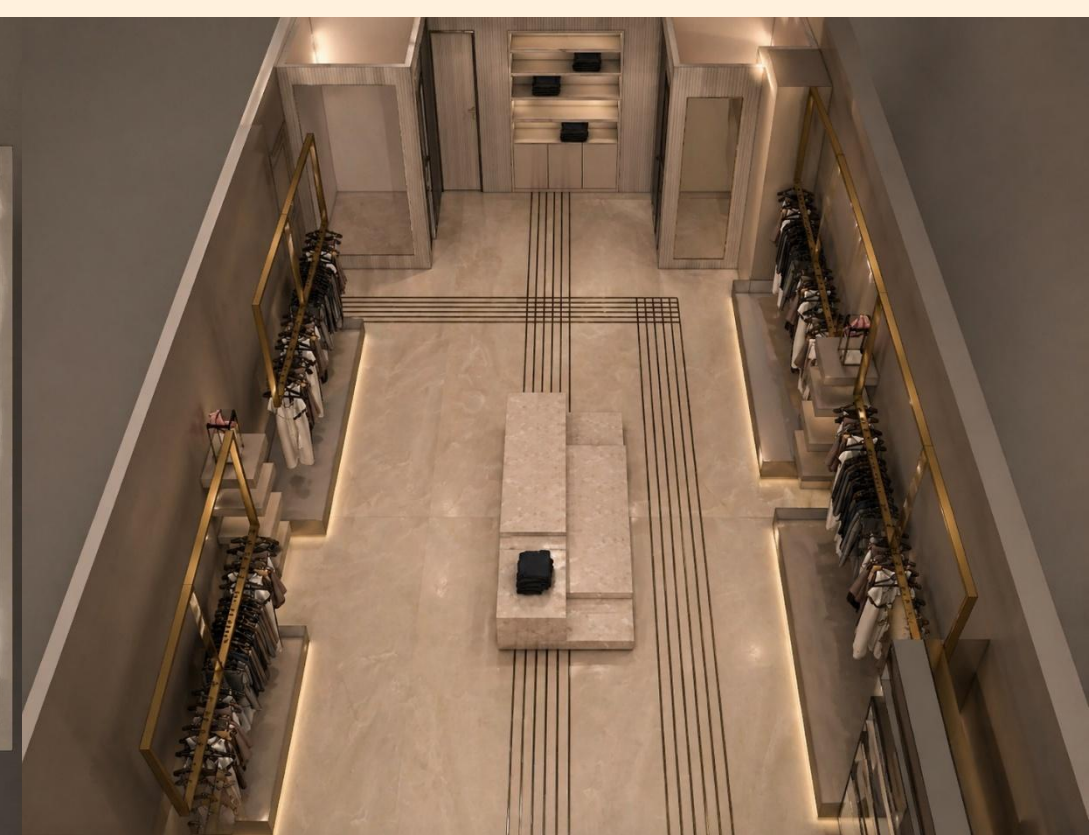

concept.

The *Ranna Gill* store is envisioned as a refined expression of modern luxury rooted in a rich design legacy. The spatial language is calm, intentional, and quietly confident allowing craftsmanship, materiality, and brand identity to take center stage without excess.

3d models.

The 3D models provide a realistic visualization of the space, highlighting materiality, lighting, and overall ambiance to help understand the design intent.

top view brief.

The top view in the 3D complements this by clearly illustrating the layout, circulation paths, and functional zoning, ensuring clarity in planning and execution. Together, they offer a complete understanding of both the spatial experience and technical arrangement.

thank you.
